New York NY 10019

Dear Stephen:

The thought occurred that you might find information on a disparity in Oswald's leg sizes in the Warren Report or Volumes. This info might be in his autopsy report. Surely, the pathologists wouldn'd have missed it -- and the autopsy was professionally done in Parkland.

Alternately, there might be something when Oswald was examined in NYC for chronic truancy. I know he was psychologically evaluated by a Dr. Hartogs, who afterward wrote a book.

Re Dillinger -- his myth lives on. A poet named Todd Moore has published two volumes of verse on Dillinger, not suprisingly named Dillinger I and Dillinger II. I've looked at the second book and it's strange stuff, mostly symbolical writing involving guns and blood. It's published by Primal Publishing out of Allston, Mass., 1992.

Best wishes,

D.
